Wash hands thoroughly after<br>handling.<br>: IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing<br>and wash it before reuse. If skin irritation occurs: Get medical attention. IF IN<br>EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if<br>present and easy to do. Continue rinsing. If eye irritation persists: Get medical |

1/10

### Section 2. Hazard identification

Supplemental label elements

: Percentage of the mixture consisting of ingredient(s) of unknown toxicity: 20%

### Section 3. Composition/information on ingredients

| Substance/mixture |
|-------------------|
| Other means of    |
| identification    |

: Mixture

: Vapor Degreasers

| Ingredient name        | % (w/w) | CAS number |
|------------------------|---------|------------|
| trans-dichloroethylene | 30 - 60 | 156-60-5   |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First-aid measures

| Description of necessary first | aid measures   |
|--------------------------------|--|
| Eye contact                    | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.  |
| Inhalation                     | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>If not breathing, if breathing is irregular or if respiratory arrest occurs, provide<br>artificial respiration or oxygen by trained personnel. It may be dangerous to the<br>person providing aid to give mouth-to-mouth resuscitation. Get medical attention if<br>adverse health effects persist or are severe. If unconscious, place in recovery<br>position and get medical attention immediately. Maintain an open airway. Loosen<br>tight clothing such as a collar, tie, belt or waistband. In case of inhalation of<br>decomposition products in a fire, symptoms may be delayed. The exposed person<br>may need to be kept under medical surveillance for 48 hours.   |
| Skin contact                   | : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.   |
| Ingestion                      | : Wash out mouth with water. Remove dentures if any. Remove victim to fresh air<br>and keep at rest in a position comfortable for breathing. If material has been<br>swallowed and the exposed person is conscious, give small quantities of water to<br>drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not<br>induce vomiting unless directed to do so by medical personnel. If vomiting occurs,<br>the head should be kept low so that vomit does not enter the lungs. Get medical<br>attention if adverse health effects persist or are severe. Never give anything by<br>mouth to an unconscious person. If unconscious, place in recovery position and get<br>medical attention immediately. Maintain an open airway. Loosen tight clothing such<br>as a collar, tie, belt or waistband. |
| Most important symptoms/eff    |  |
| Potential acute health effects |  |
| Eye contact                    | : Causes serious eye irritation.   |

| Inhalation  | <ul> <li>Exposure to decomposition products may cause a health hazard. Serious effects<br/>may be delayed following exposure.</li> </ul> |  |  |  |  |
|---|--|--|--|--|--|
| Skin contact  | : Causes skin irritation.  |  |  |  |  |
| Ingestion : Do not ingest. If swallowed then seek immediate medical assistance. |  |  |  |  |  |
| <u>Over-exposure signs/sym</u>  | <u>ptoms</u>   |  |  |  |  |
| Eye contact   | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness   |  |  |  |  |
| Date of issue/Date of revision  | : 6/28/2019 Date of previous issue : No previous validation Version : 1 2/10   |  |  |  |  |

### Section 4. First-aid measures

| Inhalation                 | : Adverse symptoms may include the following:<br>respiratory tract irritation  |
|----------------------------|--|
| Skin contact               | : Adverse symptoms may include the following:<br>irritation<br>redness   |
| Ingestion                  | : Adverse symptoms may include the following:<br>Ingestion Seek medical attention.   |
| Indication of immediate me | dical attention and special treatment needed, if necessary   |
| Notes to physician         | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours.   |
| Specific treatments        | : No specific treatment.   |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. |

#### See toxicological information (Section 11)

#### Section 5. Fire-fighting measures Extinguishing media Suitable extinguishing : Use an extinguishing agent suitable for the surrounding fire. media Unsuitable extinguishing : None known. media Specific hazards arising : In a fire or if heated, a pressure increase will occur and the container may burst. from the chemical Hazardous thermal : Decomposition products may include the following materials: carbon dioxide decomposition products carbon monoxide halogenated compounds carbonyl halides **Special protective actions** : Promptly isolate the scene by removing all persons from the vicinity of the incident if for fire-fighters there is a fire. No action shall be taken involving any personal risk or without suitable training. **Special protective** Fire-fighters should wear appropriate protective equipment and self-contained 5 equipment for fire-fighters breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

### Section 6. Accidental release measures

| Personal precautions, protect  | tiv | e equipment and emergency procedures   |
|--------------------------------|-----|--|
| For non-emergency<br>personnel | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Avoid breathing vapor or<br>mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
| For emergency responders       | :   | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions      | :   | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  |

#### Methods and materials for containment and cleaning up

| Date of issue/Date of revision : 6/28/201 | 9 Date of previous issue | : No previous validation | Version : 1 | 3/10 |
|---|--------------------------|--------------------------|-------------|------|
|---|--------------------------|--------------------------|-------------|------|

### Section 6. Accidental release measures

| Small spill | Stop leak if without risk. Move containers from spill area. Dilute with water and mop<br>up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry<br>material and place in an appropriate waste disposal container. Dispose of via a<br>licensed waste disposal contractor.  |
|-------------|---|
| Large spill | <ul> <li>Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.</li> </ul> |

### Section 7. Handling and storage

#### Precautions for safe handling **Protective measures** : Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. : Eating, drinking and smoking should be prohibited in areas where this material is Advice on general occupational hygiene handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. Conditions for safe storage, : Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible including any materials (see Section 10) and food and drink. Keep container tightly closed and incompatibilities sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

### Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name        | Exposure limits   |
|------------------------|---|
| trans-dichloroethylene | CA British Columbia Provincial (Canada,<br>5/2015).<br>TWA: 200 ppm 8 hours.<br>CA Quebec Provincial (Canada, 1/2014).<br>TWAEV: 793 mg/m <sup>3</sup> 8 hours.<br>TWAEV: 200 ppm 8 hours.<br>CA Alberta Provincial (Canada, 4/2009).<br>8 hrs OEL: 200 ppm 8 hours.<br>8 hrs OEL: 793 mg/m <sup>3</sup> 8 hours.<br>CA Saskatchewan Provincial (Canada,<br>7/2013).<br>STEL: 250 ppm 15 minutes. |
|                        | TWA: 200 ppm 8 hours.<br>CA Ontario Provincial (Canada, 7/2015).<br>TWA: 200 ppm 8 hours.   |

## Appropriate engineering controls

: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

4/10

### Section 8. Exposure controls/personal protection

| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |
|---------------------------------|---|
| Individual protection measu     | res   |
| Hygiene measures                | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br>safety showers are close to the workstation location.   |
| Eye/face protection             | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.  |
| Skin protection                 |   |
| Hand protection                 | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
| Body protection                 | <ul> <li>Personal protective equipment for the body should be selected based on the task<br/>being performed and the risks involved and should be approved by a specialist<br/>before handling this product.</li> </ul>   |
| Other skin protection           | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Respiratory protection          | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.  |

## Section 9. Physical and chemical properties

| Appearance                                   |   |    |
|--|---|----|
| Physical state                               | : Liquid. [Liquid.]   |    |
| Color  | : Clear. Colorless.   |    |
| Odor   | : Ethereal. Faint odor.                                     |    |
| Odor threshold                               | : Not available.  |    |
| рН   | : Not available.  |    |
| Melting point                                | : Not available.  |    |
| Boiling point                                | : 34.4°C (93.9°F)   |    |
| Flash point                                  | : Not available.  |    |
| Evaporation rate                             | : Not available.  |    |
| Flammability (solid, gas)                    | : Not available.  |    |
| Lower and upper explosive (flammable) limits | : Lower: 4.6%<br>Upper: 12.7%                               |    |
| Vapor pressure                               | : 21.2 kPa (159.099 mm Hg) [room temperature]               |    |
| Vapor density                                | : >1 [Air = 1]  |    |
| Relative density                             | : Not available.  |    |
| Solubility                                   | : Not available.  |    |
| Solubility in water                          | : Not available.  |    |
| Date of issue/Date of revision               | : 6/28/2019 Date of previous issue : No previous validation | Ve |

### Section 9. Physical and chemical properties

| Partition coefficient: n-<br>octanol/water | 1 | Not available. |
|--|---|----------------|
| Auto-ignition temperature                  | : | Not available. |
| Decomposition temperature                  | : | Not available. |
| Viscosity                                  | : | Not available. |
| Flow time (ISO 2431)                       | : | Not available. |

### Section 10. Stability and reactivity

| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |
|------------------------------------|--|
| Incompatible materials             | : No specific data.  |
| Conditions to avoid                | : No specific data.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| Chemical stability                 | : The product is stable.   |
| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.           |

### Section 11. Toxicological information

#### Information on toxicological effects

#### Acute toxicity

| Product/ingredient name | Result               | Species | Dose       | Exposure |
|-------------------------|----------------------|---------|------------|----------|
| trans-dichloroethylene  | LC50 Inhalation Gas. | Rat     | 24100 ppm  | 4 hours  |
|                         | LD50 Dermal          | Rabbit  | >5 g/kg    | -        |
|                         | LD50 Oral            | Rat     | 1235 mg/kg | -        |

#### Irritation/Corrosion

| Product/ingredient name | Result   | Species          | Score | Exposure                                    | Observation |
|-------------------------|--|------------------|-------|---|-------------|
| trans-dichloroethylene  | Eyes - Moderate irritant<br>Skin - Moderate irritant | Rabbit<br>Rabbit | -     | 10 milligrams<br>24 hours 500<br>milligrams |             |

#### **Sensitization**

Not available.

#### **Mutagenicity**

Not available.

#### **Carcinogenicity**

Not available.

#### **Reproductive toxicity**

Not available.

#### **Teratogenicity**

Not available.

#### Specific target organ toxicity (single exposure)

Not available.

#### Specific target organ toxicity (repeated exposure)

6/10

## Section 11. Toxicological information

#### Not available.

#### **Aspiration hazard**

Not available.

| Information on the likely routes of exposure | :          | Not available.   |
|--|------------|--|
| Potential acute health effects               | 5          |  |
| Eye contact                                  | :          | Causes serious eye irritation.   |

| Carcinogenicity                              | :          | No known significant effects or critical hazards.  |
| Mutagenicity                                 | :          | No known significant effects or critical hazards.  |
| Teratogenicity                               | :          | No known significant effects or critical hazards.  |
| Developmental effects                        | :          | No known significant effects or critical hazards.  |
| Fertility effects                            | :          | No known significant effects or critical hazards.  |
| Numerical measures of toxic                  | <u>ity</u> |  |

### Acute toxicity estimates

| Route | ATE value    |
|-------|--------------|
| Oral  | 2279.3 mg/kg |

### Section 12. Ecological information

#### **Toxicity**

| Product/ingredient name | Result  | Species                 | Exposure |
|-------------------------|---|-------------------------|----------|
| 5                       | Acute LC50 220000 to 290000 µg/l<br>Fresh water | Daphnia - Daphnia magna | 48 hours |

#### Persistence and degradability

Not available.

#### **Bioaccumulative potential**

| Product/ingredient name | LogPow | BCF | Potential |
|-------------------------|--------|-----|-----------|
| trans-dichloroethylene  | 2.09   | -   | low       |

#### Mobility in soil

| Soil/water partition | : Not available. |
|----------------------|------------------|
| coefficient (Koc)    |                  |

**Other adverse effects** : No known significant effects or critical hazards.

### Section 13. Disposal considerations

| Disposal methods | <ul> <li>The generation of waste should be avoided or minimized wherever possible.</li> <li>Disposal of this product, solutions and any by-products should at all times comply</li> </ul> |
|------------------|---|
|                  | with the requirements of environmental protection and waste disposal legislation  |
|                  | and any regional local authority requirements. Dispose of surplus and non-  |
|                  | recyclable products via a licensed waste disposal contractor. Waste should not be   |
|                  | disposed of untreated to the sewer unless fully compliant with the requirements of  |
|                  | all authorities with jurisdiction. Waste packaging should be recycled. Incineration or  |
|                  | landfill should only be considered when recycling is not feasible. This material and  |
|                  | its container must be disposed of in a safe way. Care should be taken when  |
|                  | handling emptied containers that have not been cleaned or rinsed out. Empty   |
|                  | containers or liners may retain some product residues. Avoid dispersal of spilled   |
|                  | material and runoff and contact with soil, waterways, drains and sewers.  |

### Section 14. Transport information

|                               | TDG<br>Classification | DOT<br>Classification | ADR/RID          | IMDG                | IATA           |

#### Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according : Not available. to Annex II of MARPOL and the IBC Code

### Section 15. Regulatory information

#### **Canadian lists**

| Canadian NPRI         | : | The following components are listed: Volatile organic compounds; Volatile organic compounds |
|-----------------------|---|---|
| CEPA Toxic substances | : | The following components are listed: Volatile organic compounds; Volatile organic compounds |
| Canada inventory      | : | All components are listed or exempted.  |

#### International regulations

| Chemical Weapon Convention List Schedules I, II & III Chemicals |
|---|
| Not listed.   |

#### Montreal Protocol (Annexes A, B, C, E)

Not listed.

#### Stockholm Convention on Persistent Organic Pollutants

Not listed.

#### **Rotterdam Convention on Prior Informed Consent (PIC)**

Not listed.

#### **UNECE Aarhus Protocol on POPs and Heavy Metals**

Not listed.

#### **Inventory list**

| Australia   | : All components are listed or exempted.  |
|-------------|---|
| China       | : All components are listed or exempted.  |
| Europe      | : Not determined.   |
| Japan       | : Japan inventory (ENCS): All components are listed or exempted.<br>Japan inventory (ISHL): Not determined. |
| Malaysia    | : Not determined.   |
| New Zealand | : All components are listed or exempted.  |

### Section 15. Regulatory information

| Philippines       | : Not determined.                        |
|-------------------|--|
| Republic of Korea | : All components are listed or exempted. |
| Taiwan            | : All components are listed or exempted. |
| Turkey            | : Not determined.                        |
| United States     | : All components are listed or exempted. |
|                   |  |

### Section 16. Other information
