| operation)                              | Emergency phone: (800) 858-4043   |
| Section 2. Hazard                       | ls identification   |
| OSHA/HCS status                         | : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).               |
| Classification of the                   | : GASES UNDER PRESSURE - Compressed gas   |
| substance or mixture                    |   |
| CUC label elemente                      |   |
| GHS label elements                      |   |
| Hazard pictograms                       |   |
|   |   |
|   |   |
| Signal word                             | : Warning   |
| Hazard statements                       | : Contains gas under pressure; may explode if heated.   |
| Precautionary statements                |   |
| Prevention                              | : Not applicable  |
| Response                                | : Not applicable.   |
| Storage                                 | : Protect from sunlight. Store in a well-ventilated place.  |
| Disposal                                | : Dispose of contents and container in accordance with all local, regional, national and international regulations. |
| Hazards not otherwise                   | : None known.   |
| classified                              |   |

### Section 3. Composition/information on ingredients

### Substance/mixture

Other means of identification

: Mixture

2

Processing aid Dusting agent Industrial/Professional use Date of commencement of manufacture or import December 12, 2022

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

### Section 4. First aid measures

| Description of necess | ary first aid measures   |
|-----------------------|--|
| Eye contact           | <ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower<br/>eyelids. Check for and remove any contact lenses. Get medical attention if irritation<br/>occurs.</li> </ul>  |
| Inhalation            | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| Skin contact          | <ul> <li>Flush contaminated skin with plenty of water. Remove contaminated clothing and<br/>shoes. Get medical attention if symptoms occur.</li> </ul>   |
| Ingestion             | : Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel.  |

#### Most important symptoms/effects, acute and delayed

| Potential acute health effe  |   |  |  |
|--|---|--|--|
| Eye contact  | Contact with rapidly expanding gas may cause burns or frostbite.  |  |  |
| Inhalation   | At very high concentrations, can displace the normal air and cause suffocation from lack of oxygen.   |  |  |
| Skin contact   | Contact with rapidly expanding gas may cause burns or frostbite.  |  |  |
| Ingestion  | Do not ingest. If swallowed then seek immediate medical assistance.   |  |  |
| Over-exposure signs/sym  |   |  |  |
| Eye contact  | Adverse symptoms may include the following:<br>rritation<br>edness  |  |  |
| Inhalation   | Adverse symptoms may include the following:<br>espiratory tract irritation<br>coughing  |  |  |
| Skin contact   | Adverse symptoms may include the following:<br>rostbite<br>pain or irritation<br>edness<br>fryness  |  |  |
| Ingestion  | Adverse symptoms may include the following:<br>ngestion Seek medical attention.   |  |  |
| Indication of immediate medical attention and special treatment needed, if necessary |   |  |  |
| Notes to physician   | n case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours. |  |  |
| Specific treatments  | No specific treatment.  |  |  |
| Protection of first-aiders   | No action shall be taken involving any personal risk or without suitable training.  |  |  |

#### See toxicological information (Section 11)

### Section 5. Fire-fighting measures

| Suitable extinguishing<br>media: Use an extinguishing agent suitable for the surrounding fire.Unsuitable extinguishing<br>media: None known.Specific hazards arising<br>from the chemical<br>Hazardous thermal<br>decomposition products: In a fire or if heated, a pressure increase will occur and the container may burst.<br>Bursting aerosol containers may be propelled from a fire at high speed.: Decomposition products: Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>halogenated compounds<br>carbonyl halidesSpecial protective actions<br>for fire-fighters: Promptly isolate the scene by removing all persons from the vicinity of the incident if<br>there is a fire. No action shall be taken involving any personal risk or without suitable |  |  |
|--|--|--|
| media       Unsuitable extinguishing media       : None known.         Specific hazards arising irom the chemical       : In a fire or if heated, a pressure increase will occur and the container may burst. Bursting aerosol containers may be propelled from a fire at high speed.         Hazardous thermal decomposition products       : Decomposition products may include the following materials: carbon dioxide carbon monoxide halogenated compounds carbonyl halides         Special protective actions for fire-fighters       : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable  | Extinguishing media                            |  |
| mediaSpecific hazards arising<br>from the chemical<br>Hazardous thermal<br>decomposition products: In a fire or if heated, a pressure increase will occur and the container may burst.<br>Bursting aerosol containers may be propelled from a fire at high speed.<br>: Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>halogenated compounds<br>carbonyl halidesSpecial protective actions<br>for fire-fighters: Promptly isolate the scene by removing all persons from the vicinity of the incident if<br>there is a fire. | spray to keep fire-exposed containers cool.  | Special protective actions for fire-fighters   | there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water |
|  | Special protective equipment for fire-fighters |  |

### Section 6. Accidental release measures

| Personal precautions, protec   | tive equipment and emergency procedures   |
|--------------------------------|---|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. In the case of aerosols being ruptured, care should be taken due to the rapid<br>escape of the pressurized contents and propellant. If a large number of containers are<br>ruptured, treat as a bulk material spillage according to the instructions in the clean-up<br>section. Do not touch or walk through spilled material. Put on appropriate personal<br>protective equipment.   |
| For emergency responders       | : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions      | : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).   |
| Methods and materials for co   | ntainment and cleaning up   |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                    | : Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

### Section 7. Handling and storage

| Precautions for safe handling                                      |   |  |  |  |
|--|---|--|--|--|
| Protective measures  | : | Put on appropriate personal protective equipment (see Section 8). Pressurized container: protect from sunlight and do not expose to temperatures exceeding 50°C. Do not pierce or burn, even after use. Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing gas. Avoid breathing vapor or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Empty containers retain product residue and can be hazardous. |  |  |
| Advice on general occupational hygiene                             | : | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |  |  |
| Conditions for safe storage,<br>including any<br>incompatibilities | : | Store in accordance with local regulations. Store away from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Protect from sunlight. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.  |  |  |

### Section 8. Exposure controls/personal protection

#### **Control parameters**

| _            |          |        |
|--------------|----------|--------|
| Occupational | exposure | limits |

None.

#### **Biological exposure indices**

No exposure indices known.

| Environmental exposure<br>controls: Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.Individual protection measures: Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.Eye/face protection: Safety eyewear complying with an approved standard should be used when a risk<br>assessment indicates this is necessary to avoid exposure to liquid splashes, mists,<br>gases or dusts. If contact is possible, the following protection should be worn, unless<br>the assessment indicates a higher degree of protection: safety glasses with side-<br>shields.Skin protection: Chemical-resistant, impervious gloves complying with an approved standard should be<br>worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check<br>during use that the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be different for different<br>glove manufacturers. In the case of mixtures, consisting of several substances, the<br>protection if of the gloves cannot be accurately estimated.Body protection: Personal protective equipment for the body should be selected based on the task being<br>performed and the risks involved and sho | Appropriate engineering controls | :          | Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.   |
|---|----------------------------------|------------|--|
| Hygiene measures: Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. ### Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.           |
|------------------------------------|--|
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| Conditions to avoid                | : No specific data.  |
| Incompatible materials             | : No specific data.  |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

### Section 11. Toxicological information

#### Information on toxicological effects

### Acute toxicity

Not available.

### Irritation/Corrosion

Not available.

Sensitization Not available.

#### \_\_\_\_

Mutagenicity Not available.

### **Carcinogenicity**

Not available.

#### **Reproductive toxicity**

Not available.

#### **Teratogenicity**

Not available.

### Specific target organ toxicity (single exposure)

Not available.

### Specific target organ toxicity (repeated exposure)

Not available.

### Aspiration hazard

Not available.

### Information on the likely : Not available. routes of exposure

| Potential acute health effects |   |
|--------------------------------|---|
| Eye contact                    | : Contact with rapidly expanding gas may cause burns or frostbite.                                    |
| Inhalation                     | : At very high concentrations, can displace the normal air and cause suffocation from lack of oxygen. |
| Skin contact                   | : Contact with rapidly expanding gas may cause burns or frostbite.                                    |
| Ingestion                      | : Do not ingest. If swallowed then seek immediate medical assistance.                                 |

### Section 11. Toxicological information

#### Symptoms related to the physical, chemical and toxicological characteristics

| Eye contact  | : Adverse symptoms may include the following:<br>irritation<br>redness                                 |
|--------------|--|
| Inhalation   | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing              |
| Skin contact | : Adverse symptoms may include the following:<br>frostbite<br>pain or irritation<br>redness<br>dryness |
| Ingestion    | : Adverse symptoms may include the following:<br>Ingestion Seek medical attention.                     |

| Delayed and immediate effect   | ts and also chronic effects from short and long term exposure |
|--------------------------------|---|
| Short term exposure            |   |
| Potential immediate effects    | : Not available.  |
| Potential delayed effects      | : Not available.  |
| Long term exposure             |   |
| Potential immediate<br>effects | : Not available.  |
| Potential delayed effects      | : Not available.  |
| Potential chronic health effe  | ects  |
| Not available.                 |   |
| General                        | : No known significant effects or critical hazards.           |
| Carcinogenicity                | : No known significant effects or critical hazards.           |
| Mutagenicity                   | : No known significant effects or critical hazards.           |
| Reproductive toxicity          | : No known significant effects or critical hazards.           |
|                                |   |

### Numerical measures of toxicity

Acute toxicity estimates

N/A

### Section 12. Ecological information

#### **Toxicity**

Not available.

### Persistence and degradability

Not available.

### **Bioaccumulative potential**

Not available.

### Mobility in soil

Soil/water partition coefficient (Koc)

: Not available.

### Section 12. Ecological information

Other adverse effects

: No known significant effects or critical hazards.

### Section 13. Disposal considerations

- **Disposal methods**
- : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Do not puncture or incinerate container.

### Section 14. Transport information

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

The customer is responsible for determining the PPE code for this material. For more information on HMIS® Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual.
